EMPLOYMENT HISTORY

Greene King

London, UK

Front-of-House Supervisor

Mar 2025 – Present

Front-of-House Team Member

Aug 2024 – Mar 2025

- Promoted to Supervisor within seven months after demonstrating reliability, leadership and strong performance
- Lead and support a team of nine, coordinating floor, bar and kitchen operations, and making operational decisions when acting as duty manager
- Manage approximately 250 weekly bookings across telephone, email and in-person channels, coordinating customer requirements, table plans and service delivery
- Resolve complex customer issues during peak trading periods, de-escalating conflict and balancing customer, team and commercial priorities
- Build relationships with regular customers and group organisers, contributing to repeat business through clear communication and reliable service
- Support revenue generation through tailored recommendations, upselling and cross-selling

AEM Engine Service

Tallinn, Estonia

Digital Project Lead (Freelance)

Sept 2023 – Aug 2024

- Owned end-to-end delivery and ongoing improvement of a WordPress website for a B2B maritime engineering business, contributing to an estimated 20% increase in inbound customer enquiries
- Acted as the principal contact for the business owner, translating commercial priorities into practical digital outputs and managing expectations around scope, timelines, and feasibility
- Researched, produced, and maintained content across the website, social media, and promotional videos, improving clarity, consistency, and accessibility of specialist service information
- Handled evolving priorities independently, coordinating updates and providing responsive support as business needs changed

Career Break

Travelling & Personal Development

May 2022 – Sept 2023

National Physical Laboratory

London, UK

Junior Science Writer (E-learning Development)

Oct 2017 – May 2022

- Began in a science writing role, working with scientists and subject matter experts to translate complex technical subjects into clear, accurate content for non-specialist audiences
- Expanded into digital learning development following the launch of NPL's e-learning platform in 2019, designing and building interactive courses using text, graphics, video, and assessments
- Managed courses from initial scoping through development, stakeholder review, quality assurance, and publication, balancing multiple projects and competing priorities
- Produced approximately 3–4 courses per quarter for external clients and learners, expanding the reach and commercial delivery of NPL's training services
- Co-developed the UK's first apprenticeship in metrology, subsequently adopted by 6 training providers, through curriculum development and collaboration with internal and external stakeholders
- Acted as a communications link between subject matter experts, delivery teams, and external stakeholders, resolving information gaps and ensuring delivery met agreed scope, quality and accuracy requirements
- Represented NPL at the 2018 3D Metrology Conference in Hamburg, gathering industry insight to support apprenticeship and curriculum development

British Army

UK

Fusilier

Oct 2014 – Jun 2017

- Completed basic training while balancing university studies, demonstrating discipline, resilience, personal accountability, and the ability to perform under pressure
- Developed teamwork, communication, and situational awareness in structured, high-responsibility environments

Immediate Media

Bristol, UK

Editorial Assistant, BBC Sky at Night Magazine (Placement)

Dec 2016

- Researched and wrote astronomy news content for non-specialist audiences, combining interviews with subject matter experts and accurate interpretation of technical information
- Supported audience engagement through social media, gaining experience in external communications and working to editorial deadlines

VOLUNTEERING

STEM Learning

UK

STEM Outreach Volunteer

Feb 2016 – Mar 2021

- Delivered outreach sessions in schools, adapting technical content and communication style for different age groups, teachers, and learning contexts
- Represented STEM organisations publicly, strengthening public speaking, engagement and relationship-building skills
